1 Introduction

This is my intro. All of this uses the amazing (Xie 2016) package.

Bookdown extends the syntax provided by R Markdown, allowing automatic numbering of figures / tables / equations, and cross-referencing them.

2 Results

Amazing results after introducing the story in Section 1.

2.1 About the Normal Distribution

- Problem of “floating environments” in LaTeX

Figure 1: Red trees in autumn

16 It's a pretty cool bell curve in Figure 1 1. Whatch out for `_` in cross-referencing labels!

17 If you want to cross-reference figures or tables generated from a code chunk, please make
 18 sure the chunk label only contains alphanumeric characters (a-z, A-Z, 0-9), slashes (/), or
 19 dashes (-).

20 It is always good to have some Greek letters in your paper! Like Equation (1) below:

$$f(k) = \binom{n}{k} p^k (1-p)^{n-k} \quad (1)$$

Table 1: A table of the first 10 rows and three columns of the diamonds data.

2.2 About the scatter plot

Figure 2: Loud Kookabara

- 22 We created the simple Table 1. See more on tables and long tables <https://bookdown.org/yihui/bookdown/tables.html>.

- 24 You can also see a scatter plot in Figure ??.
